

The Difference Card

The Difference Card + FSA

Using The Difference Card with a Healthcare Flexible Spending Account (FSA)

If you are enrolled as a member of The Difference Card, your card is programmed to allocate the appropriate dollar amounts from your Difference Card Account AND your FSA Account.

The Difference Card provides instant access to the money in your Healthcare FSA Account.

When you visit the doctor's office, pharmacy, dentist, or vision center, you can swipe your Difference Card to pay for out-of-pocket expenses from your FSA Account.

If you are using your Difference Card to pay a copay, the card will swipe for the amount listed on your Benefit Summary chart and the remaining amount will be taken from your FSA funds. All with just ONE swipe!

Simply present your card at the point of service. If the provider accepts MasterCard, they can accept The Difference Card.

PLEASE NOTE:

Deductible expenses, even with an FSA, cannot be swiped on The Difference Card.

You cannot use your Difference Card to pay for Deductible expenses online.
